Designing

Coding

Luntiny creates memorable, human-centric experiences for users. We make full-development of planning, designing and coding for front-end web design.

We begin every project with the same question: Where can we add value?

**Experience our interactive content**
1] Load up the App Storefront on your smart device Google Play or Apple's App Store
2] Download and install the free app: Aurasma
3] Use the Aurasma app to view interactive content through your device. The images tagged with the left icon contain interactivity
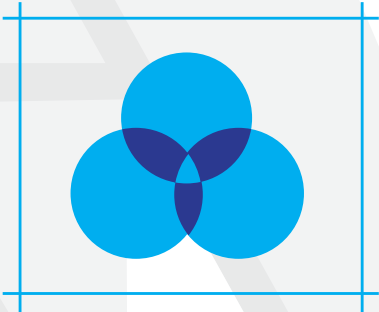

Services
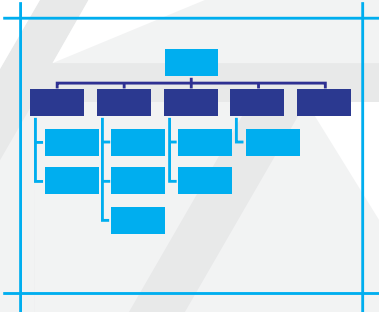

Site Planning

We understand the importance of planning website. We accommodate a wide array of clientele as well as their various business needs and goals.

Prototype Mockups

Just tell us your designs and Luntiny will transform your idea into clickable, interactive prototypes complete with gestures, transitions, and animations.
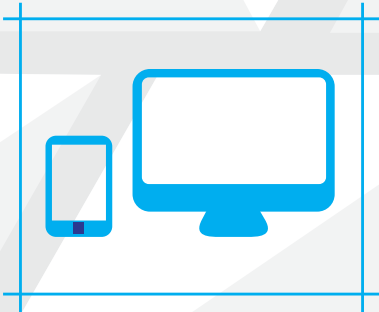

Users Experience

We combine our knowledge of visual design, information architecture, and interaction design to create memorable, human-focused experiences that improve the usability and appearance of your product.

User Interface

We design good UI that has high conversion rates and is easy to use. In other words, it's nice to both the business side as well as your clientele using it.

Responsive Design

We develop native RWD for across a wide range of device. We leverage our ability to design unique and intuitive experiences to build quality products that transcend user expectations.

Web Coding

We design and build sites that deliver everyday simplicity to your users. We use the latest in web technologies HTML5, CSS3, JavaScript use to develop a seamless experience between design and development.
